Pacific Time. 3pm-5pm is ideal.*

Cyber Security Consultant

Accenture

September 2019 – August 2022

This is a post-acquisition continuation of my previous role. In this time I rose from a team member to a team lead.

Associate Consultant

Deja vu Security

May 2018 – August 2019

In this role I worked in a vulnerability management program across all phases of the bug lifecycle. This included:

- Impact Analysis
- Remediation
- Automated Testing

I primarily worked with application security including low-level C code in a Linux environment (manual memory management, installation of custom kernel modules) and my client's custom applications written in Java. I also analyzed network traffic from malicious applications in controlled environments.

Certifications

ISC2 SSCP - 2024

Bachelor of Science – Software Development

Western Governor's University

2017
